EXAMINER'S AMENDMENT

Applicant's amendment filed 1/16/2007 is entered. The amendments to claims 12, 13, 18 and 19, the amendments to the specification and the terminal disclaimer are acknowledged.

The terminal disclaimer filed on 1/16/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/882,994 has been reviewed and is accepted. The terminal disclaimer has been recorded.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mayumi Maeda on 3/28/2007.

The application has been amended as follows:

Claims 1-11 have been cancelled.

At claim 13, line 2, "at least concentrically-arranged pressure rings" has been changed to --at least three concentrically-arranged pressure rings--.

At the replacement paragraph 96, line 2, "FIG. 14" has been changed to --FIG. 14)--.

Art Unit: 3736

The following is an examiner's statement of reasons for allowance: no prior art of record teaches or fairly suggests at least three concentrically-arranged pressure rings wherein the at least three concentrically-arranged rings apply pressure in an oscillating manner with asymmetric deployment and retraction cycle timing, and wherein only one of the at least three concentrically-arranged pressure rings is deployed at a time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Douglas et al. (US 5,951,493), Perez et al. (US 6,706,000), Perez et al. (US 2002/0188223) disclose apparatus for expressing body fluid from an incision. Olson et al. (US 2006/0184189) discloses a cap for a dermal lancing device. Bylund et al. (US 2003/0212379) discloses a system and method for analyte monitoring.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Apanius whose telephone number is (571) 272-5537. The examiner can normally be reached on Mon-Fri 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone
